REPLIT PROOF OF USE

SDC Hackathon 2026 · Domain 2 · Preliminary Round

Team name	ZH (solo)
Team leader	Wong Zong Han
Project	ChaseFlow for Orbyte
Live deployment URL	https://chaseflow-orbyte.replit.app
GitHub repository	https://github.com/johnwong2403/chaseflow-orbyte
Deployment type	Replit Deployments (Autoscale)
Replit plan	Replit Core, provided through the SDC portal

How Replit is used in this project

- Development: the code is edited and run in a Replit workspace.
- Hosting: the live prototype is deployed with Replit Deployments (Autoscale) at the URL above.
- Secrets: the Gemini API key is stored in Replit Secrets, not in the code.
- Replit Agent ran once when the project was imported and did not change any files.

The live URL above is the proof of use. It opens the team's own deployed prototype.
See also the Technical & Tools Declaration.
